

TO KWVA

Hello, KWVA! I am a 16 years old student. And I live in Goyang City, Gyeonggi-Do. I already knew the huge event which is the Korean War. By doing this campaign, I knew that I noticed that the Korean War was more serious than I thought.

The war was started with the sudden attack of Northern Korea in the midnight. At first, only Korean armies fought with the North. Therefore, we were pushed down to Busan which is located in the south of Korea. At that period, the American Armies came to Korea to help.

The Korean Armies and the American Armies fought with the North.

Many veterans who participated in the war had passed away.

However, there was a big operation called the Incheon Landing

Operations. The leader of this operation was McArthur who is a famous

American Veteran. The operations were very successful. Therefore, we

pushed the North away to the northern part of Korea.

If there were no American Veterans, we might have been defeated. And

the big cities in Korea were never be existed. Moreover, we might have been suffering from starvation.

Thank You, KWVA!
